- c. Proposed research
 - A research project to investigate the basis of the seismic restraint exemption for components weighing less than or equal to 75 lb. that are in-line with a duct system was suggested by Karl Peterman.
 - Robert Simmons and Jim Tauby will prepare an RTAR for the 75 lb exemption investigation.
 - TC5.2 and TC5.3 were suggested as possible partners in the research project.
 - 12-inch rule - Robert Simmons, Aaron, Prasad – ASCE 7-22 and is planned for ASCE7-28 for 12-inch rule exemptions, but it needs help. The changes put in for 2016 version were based on testing done by Intel and promoted at SEAOC. The testing didn't reflect actual installation conditions for HVAC components. We need to redo that testing and include single clevis hung rods of larger sizes to substantiate future changes to the exemptions in ASCE7.
