## NOTES FROM CHAIR

As of July the roster has changed so be sure to update any distribution lists that you may use for subcommittees and working groups.

With the approval of the workplan we have a very aggressive plan to work to net carbon neutral by 2031. This will require strong support from the SSPC members and consultants as well as industry partners. Over the past few years we have faced challenges with COVID and thanks to everyone for trying to continue the work with virtual meetings and hybrid meetings, but we would like to get back to face to face meetings as they are more productive and help with collaboration with subcommittees and working groups.

We also would like to explore focused meetings to develop and explore new energy savings concepts like electrification, smart grid interface and carbon reduction
