

90.1 QUARTERLY

Spring 2024

CLIMATE ZONE UPDATE FOR 2025

There are two major changes pending for climate zones in 90.1.

The first change is our recent adoption of 169-2021, Climatic Data for Building Design Standards. This will be finalized with the upcoming publication of Addendum v to 90.1-2022. Previously, the standard has referenced 169-2013.

The second change is climate zone tables will no longer be reproduced in the standard via Annex 1. We will instead be making it a digital resource. Users will retain access to the data they need while we can cut down on our page count.
